Grill - rail mount, stainless steel	0	0	0	0	0

Always remember that a balanced load is important to good performance and safety while operating any marine product. Operating a boat with a bow-heavy load can cause poor performance and could be considered a safety hazard. Certain motors perform better with optional hydrofoil. Large diameter propellers may enhance performance. Specifications are subject to change without notice. Many options shown must be ordered from the factory prior to manufacturing. Premier Marine is not responsible for typographical errors.

\* This is a general warranty overview only. Please refer to the detailed warranty section in the dealer's manual for a complete list of items covered or not covered by Leisure Pontoons.

## Leisure is an ISO 9001:2000 certified manufacturer.

ISO (International Organization for Standardization) is a global network that identifies what international standards are required by business, government and society, develops them in partnership with the sectors that will put them to use, adopts them based on national input, and delivers them to be implemented worldwide. ISO standards level the playing field. They make transparent the requirements that products must meet on world markets, as well as the conformity assessment mechanisms for checking that those products measure up to standards.

Leisure Pontoons is proud to be the first pontoon manufacturer to receive this prestigious certification and pass on the high standard of manufacturing required by ISO to our customers. What does this mean to you? A better product through better business practices.
