

PREMIER
GO BEYOND

PREMIER
GO BEYOND

TAKE YOUR BOATING EXPERIENCE BEYOND WITH PREMIER.

We believe being on the water creates moments like no other and memories that last forever. For the past 30 years, Premier Marine has worked tirelessly on making those moments better by striving to create the world's best pontoons. To get there takes more than hard work. It's always looking for ways to improve. It's never settling and always going the extra step. This passion is what defines us and will continue to drive us in making your boating experience the best ever. This is what we believe. This is going beyond. This is Premier.

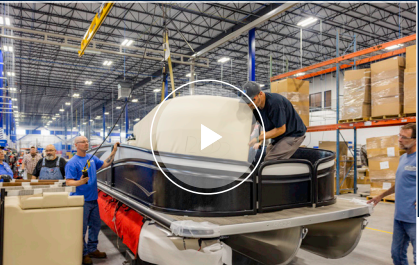

THIS IS GOING BEYOND – AND THIS IS PREMIER.

REDEFINING THE MEANING OF STATE OF THE ART.

At Premier Marine, we know it takes more than hard work and dedication to build a pontoon that truly defines excellence. It takes the best materials, the best construction methods, the best technology, and the best people all working together under one roof to create something exceptional. It was this understanding and this desire that led us to the development and construction of our all-new, world-class manufacturing facility in Big Lake, Minnesota. Spanning more than 150,000 square feet, it features the latest technology in fabrication, assembly, and quality control, making it one of the most advanced manufacturing facilities in the industry. It's just one more example of how we are driven to GO BEYOND.

Experience our world-class facility in action and understand our manufacturing process at [pontoons.com](http://www.pontoons.com).

THE SHAPE THAT REDEFINED THE RIDE.

PTX TECHNOLOGY — FEEL THE ADVANTAGE.

Premier Marine literally reshaped the pontoon industry when we introduced our exclusive PTX™ technology nearly 30 years ago, and our latest generation design continues to lead the way for 2023. With race-proven lineage, the purposeful center tube shape of PTX Technology delivers a smoother ride with sharper handling and the ability to quickly get on plane. You'll enjoy greater comfort, more confidence, and a level of performance never before thought possible in a pontoon.

THE PTX ADVANTAGE

CENTER-TUBE FUEL TANK

Keeps center-of-gravity low for greater stability and more responsive handling.

UNDERSIDE PERFORMANCE SHEETING

Reduces water cohesion and drag for increased performance and fuel efficiency.

INWARD-FACING LIFTING STRAKES

Work in unison with the center tube to get the pontoon on plane quickly.

PERFORMANCE PLANING SURFACE

Is a Premier exclusive design featuring a flat surface to greatly reduce drag.

VARIABLE RIDE SURFACE

Provides a performance surface when turning for sharp, predictable handling.

A BETTER DESIGN, A BETTER EXPERIENCE.

While PTX Technology may start with a superior hull shape, it doesn't end there. The fully integrated design is more responsive, offers expanded storage, and delivers greater efficiency. It all adds up to a better boating experience.

SMOOTHES ROUGH WATER Ride with more comfort and more confidence over rough chop.

SHARPENS EVERY TURN Take control and turn tighter with greater precision and less wash.

GETS ON PLANE QUICKER Get up and get moving quicker and enjoy faster acceleration.

See the smooth performance of PTX in action. Watch the PTX Video at pontoons.com.

DISCOVER THE DIFFERENCE.

WE ARE BUILDING PERFECTION.

Using the best materials and the most advanced construction methods is only the first step in our commitment to delivering industry-leading quality. More importantly, our pontoons are assembled by some of the world's best professional boat builders. People who take pride in their work and never settle for mediocrity. People who love being on the water and for that reason, continuously push to design and build the world's absolute best pontoons.

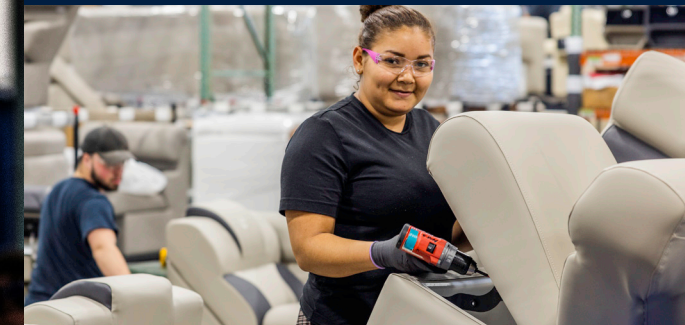

STRONGER TUBES

Rough water and high horsepower engines require a pontoon that can take the abuse. It's why Premier pontoons feature a solid-welded keel; 25" or 27" diameter tubes that exceed the industry average; and a thicker .090" gauge aluminum with internal baffles for added strength.

COMPOSITE FURNITURE

We love spending time on the water, but it can also be a harsh environment. It's just one of the reasons we utilize a roto-molded design. The composite furniture has no wood to rot or break down over time and features UV-stable fabrics that stand up to extreme conditions.

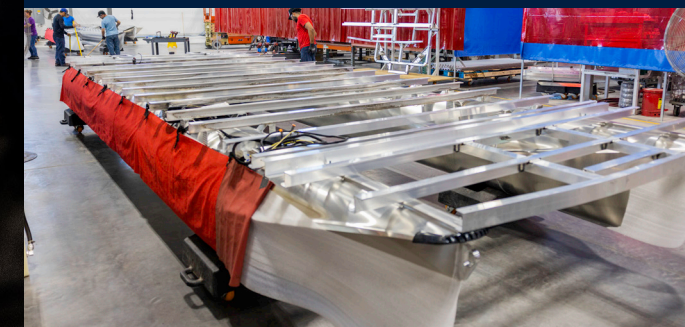

THICKER RAILS

There's beauty in the strength of our rails and sidewalls. Featuring dual work-hardened panel construction with full-epoxied seams, they provide greater rigidity, less vibration, and reduced noise for a difference you can feel and quality that lasts.

RUGGED DECKING

Others talk about deck strength, but you need a design that's truly stronger to back it up. Our extruded Z-Channel floor supports are not only stronger, we put them just 16" apart. We then top them with 7-ply marine-grade plywood using stainless hardware and bonded seams.

WE'VE GOT YOU COVERED FROM BOW TO STERN

At Premier, we don't just talk quality, we guarantee it with one of the industry's best warranties. We start with a limited, transferable lifetime warranty on the key constructional components, including chassis, deck, and tubes. We then complement it with a comprehensive 10-year bow-to-stern warranty. See your dealer for details.

**Available on all models except the Sunspree, which is backed with a 7-year bow-to-stern warranty.*

FIND YOUR SOULMATE.

FOR EVERY PASSION, THERE'S A PREMIER FOR YOU.

Whether you want to rule the lake, entertain friends, make a splash with your kids, or find a hidden cove to catch your limit, Premier has a pontoon for you built to GO BEYOND. Each one expertly crafted with a level of quality that surpasses the industry standard and delivers an experience that exceeds your expectations.

BUILD YOUR PREMIER AT WWW.PONTOONS.COM

WE ARE PREMIER MARINE.

Born from American ingenuity and the satisfaction that only comes from an honest, hard-day's work. Those are the values that have helped to define Premier Marine for the past and will remain part of our DNA for the next 30 and beyond. It's why we're proud of our new Big Lake, Minnesota facility, and even more so of our made in the USA boats. We are an American manufacturer, home to boaters, dreamers, and doers. We build the world's best pontoons — creating a place where friends gather, family always comes first, and memories last forever. Welcome home.
